Video games, Listening to music, shooting hoops and going for walks.

Chrysalis Clubhouse Chronicles Summer 2022

Chrysalis Clubhouse VIBES

By: Cody Vogel

From the very beginning, Chrysalis has been there to help in people's journeys to their own recovery. As Chrysalis kept this path going, an idea was put on the table, an idea that would not only help someone in their own recovery, but an idea that would also grow the Chrysalis community.

This idea was to launch and open Chrysalis's very own Clubhouse. As one of the first Chrysalis Clubhouse members, I didn't know what to expect when I joined, but the word that stuck out to me was the word "Club". I saw an opportunity to not only recover in my own journey, but to help others in their own journey too. I may not be a staff of Chrysalis or even a leader, but none of that matters to me.

At Chrysalis Clubhouse, we are all equal. Every member or colleague has their strengths and their weaknesses. By working as a team, we can learn from each other and turn those weaknesses into strengths. When someone walks into Chrysalis Clubhouse as either someone who's a member or someone new, we each have two things that guide us. The first thing is their name and the second thing is their journey. When coming into Chrysalis Clubhouse, we don't disrespect, criticize, or judge anybody on who they are or what they have gone through.

When someone gets a tour from Chrysalis Clubhouse one of the things we want is to get to know them the best we can, but at that person's pace and comfortability, and as Chrysalis Clubhouse always says giving a tour "stop us at any time and ask questions". Knowing what I know about Chrysalis Clubhouse and in my eyes, Chrysalis Clubhouse is a place of community and is also a place for every individual to grow in their own recovery but to also know they are not alone and everybody can guide each other. We are a team. We are a community. We've got each other's backs at Chrysalis Clubhouse!

THANK YOU
